ENGINEERED HVAC PRODUCT SPECIALISTS AND DISTRIBUTORS

Classroom Preferred™
School HVAC Solutions.

THE EDUCATED CHOICE FOR FLORIDA'S CLASSROOMS

AccuAir/Bard's mobile showroom (shown below) will be traveling throughout Florida demonstrating the I-TEC System, Bard's flagship Classroom Preferred™ HVAC solution! It features the latest developments in packaged indoor HVAC technology, making I-TEC:

- the favorite choice of school boards
- the selection and basis of design of mechanical engineers
- the preferred HVAC concept of architects

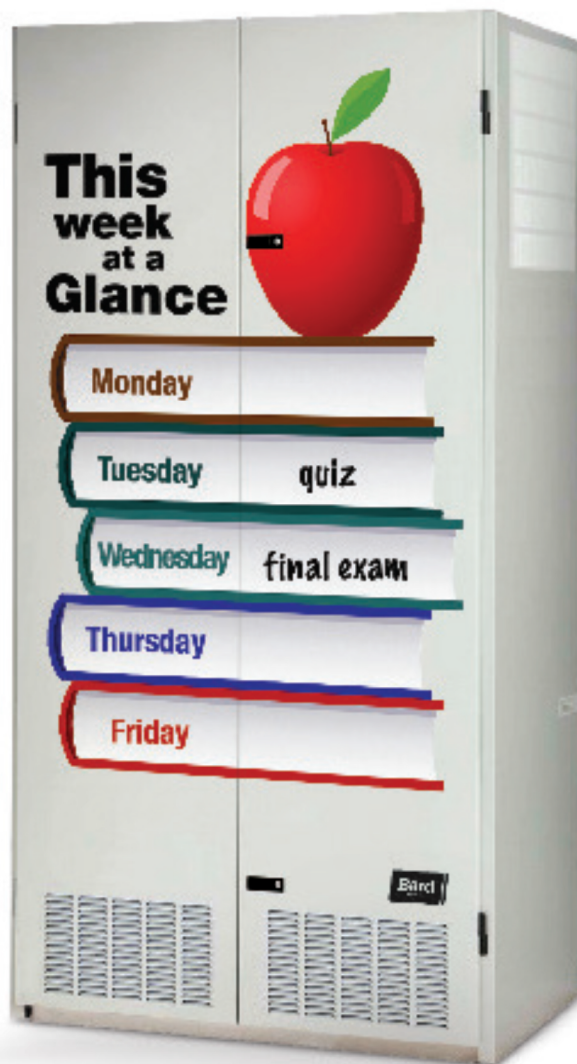

The AccuAir/Bard mobile trailer features a fully functional I-TEC unit, allowing us to demonstrate first-hand this revolutionary system's incredible quietness, efficiency, versatility and easy serviceability.

AccuAir team left to right:
Penny Anderson, Greg Duggan, Frank Suranyi
and Bard's representative Leon Essex.

The road show is intended to inform and educate the managing personnel of schools and other public facilities, consulting engineers, architects, and the owners and operators of commercial buildings how easy and cost-effective it is to maintain a healthy and comfortable indoor environment. Whether for new construction, renovation or retrofit applications, the I-TEC unit satisfies even the most challenging HVAC demands.

Featuring numerous options and accessories, the I-TEC system is versatile, flexible and durable, making it an unbeatable value up-front and over time.

When it comes to comfort control, there are countless reasons to love the AccuAir-Bard I-TEC system:

- Highest efficiencies (12.0 EER/16.5 IPLV) for energy and cost savings
- Lowest sound levels (less than 40 dBA) for super quiet operation
- Energy recovery (total enthalpy) for energy savings, code compliance
- Hot gas reheat dehumidification creates a comfortable, healthy indoor environment
- Ventilation options for numerous ways to meet fresh air requirement code(s)
- Energy conservation enables energy savings, individual control

These and many other reasons make I-TEC the smart, effective choice for classrooms, office spaces, community centers, civic halls, places of worship, and other facilities. To really understand how superior it is to other HVAC units, you need to scrutinize and review the I-TEC system in person.

The AccuAir/Bard I-TEC Roadsow comes to you!

We invite you to experience I-TEC's unsurpassed comfort, customized controls and exceptional quiet by bringing our mobile showroom right to your site. Our trailer is customized to accurately demonstrate the temperature and sound level you can expect in an enclosed area like a classroom or office so you can witness this amazing unit in action. We also invite you to check under the hood and see why routine maintenance is a breeze, and ask our friendly, no-pressure experts every practical and technical question. One visit and you'll know why I-TEC is the Classroom Preferred HVAC Solution!
